### Please enjoy the first bite plain.

Unlike conventional steaming, ingredients prepared with hell steaming retain their natural umami flavor even when eaten plain.

The secret lies in temperatures nearing 100°C and the minerals within the steam.

The high-temperature steam concentrates the ingredients' flavor and umami, while the minerals add a subtle saltiness, maximizing the inherent deliciousness of the ingredients.

Our table condiments are also selected to complement the ingredients' natural flavors.

We invite you to savor the unique taste of Beppu.
